## DETAILED ACTION

### *Drawings*

The drawings are objected to under 37 CFR 1.83(a) because they fail to show  $z_M$  as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 6a, 6b, 6c, and 8. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to because on page 11, line 7 of the specification, “objective lens (4)” should read – *quadrupole (4)* –. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/018,193

Art Unit: 2881

Regarding claims 8-11, Henstra et al. discloses in Figs. 1-3 an electrostatic corrector for eliminating chromatic aberration of particle lenses having a straight optical axis and an electrostatic quadrupole for allocation to an objective lens, said electric corrector comprising two symmetrical corrector pieces positioned behind said electrostatic quadrupole and along said straight optical axis in a direction of radiation, said two corrector pieces having quadrupole fields rotatable  $90^\circ$  about said straight optical axis in relation to one another, with rotation able to occur so that a first astigmatic intermediate image of a first section lies in a first corrector piece of said two corrector pieces and a second astigmatic intermediate image perpendicular thereto, of a second section, lies in a second corrector piece of said two corrector pieces, with an additional electrostatic quadrupole being located on an output side, with each of said two corrector pieces having three electrical quadrupole fields with said electrostatic quadrupoles being overlaid with a circular lens field. The corrector can further comprise octopole fields and further comprise a third corrector piece. (See Col. 1, Lines 6-30; Col. 1, Line 65 through Col. 2, Line 16; Col. 12, Lines 28-34; Col. 16, Lines 7-9; Col. 18, Lines 16-30; Col. 19, Lines 27-34).

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

***Claim Objections***

Claim 13 is objected to because of the following informalities: the term "field" is misspelled in the fourth line of the claim. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 8-14, as the claims are understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Henstra et al. (6,184,975).
